DETAILED ACTION

1. Claims 1-6,8-13,15-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Steuerle et al (6,056,967).

The claims are rejected for the reasons given in the previous Office Action, Paper No.4.

2. Claim 14 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art does not show or suggest the claimed crosslinking agent.

3. Applicant's arguments have been considered but are deemed unpersuasive of patentability.

Applicant's arguments imply that the crosslinking agent in Steuerle et al is limited to carboxyl compounds. Column 6 and the class of crosslinking agent disclosed in column 7, Formula I of Steuerle et al includes crosslinking agents other than carboxyl compounds. The value of n is up to 22 and the compound of Formula I is inclusive of the compound claimed in claims 3 includes carboxyl compounds as "X" can be carboxyl.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 1731

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
